Subject: TRAFFIC GROWTH PROJECTION
Attachments: Traffic Growth Projection.pdf

All ...

Please find attached our estimate of traffic growth out to 2031 based on our knowledge of likely housing unit increased during that period.

This will be discussed with Hampshire County Council at our meeting on 7th December.

Our calculation (to convert to AADT) may be questioned, but whatever the result is ...

... the massive growth over the period must be recognised.

The question then is how does the Roads Authority intend to address the impact of a 26% increase in the average and maximum flows on the A3023?

The traffic growth numbers are conservative as no estimate has been made for (a) the traffic resulting from the 10,000 new houses in the HBC area, and (b) the HBC plans to attract increased tourism to the Hayling Island beach area.

Regards
